ORACLE PARTNER ARCHITECTS & SPECIALIZATION TRAINING

ORACLE TECHNOLOGY, HARDWARE
AND APPLICATIONS BEYOND THE OBVIOUS

ORACLE®

Dear partner,

Fact: by being an Oracle partner, your company already belongs to a small circle of Oracle experts. But...

Question 1: are you making the best possible use of our technology solutions?

Question 2: are you making the best possible use of your acquired Oracle knowledge?

Having doubts? Keep on reading.

Are you making the best possible use of our technology solutions?

From October until March, we organize a new edition of the Oracle Partner Architects & Specialization Training. It includes a lot of different new training tracks, aimed at providing your experts, architects and consultants with both basic and in-depth architectural knowledge about the newest Oracle technology. It's your chance to learn from the best. We offer seasoned speakers and exclusive content. No product marketing. Oracle technology beyond the obvious.

Joining the training gives you the opportunity to:

- differentiate your company through expertise in leading Oracle IT solutions
- get a few steps closer on earning the 'OPN Specialized Partner' status, which gets you numerous extra advantages
- get your experts, architects and consultants up to speed on specialized services and solutions

We offer 3 different sessions for each track. Take your pick!

- technical introduction → beginners
- architects session → architects
- preparation implementation exam with tips and tricks to earn the 'OPN Specialized Partner' status → specialists

Choose from **any of the online training sessions**.

Topics include:

- Cloud Computing
- User engagement for social business
- Service Integration and BPM
- Data Integration
- Security
- BI
- Database
- Hardware

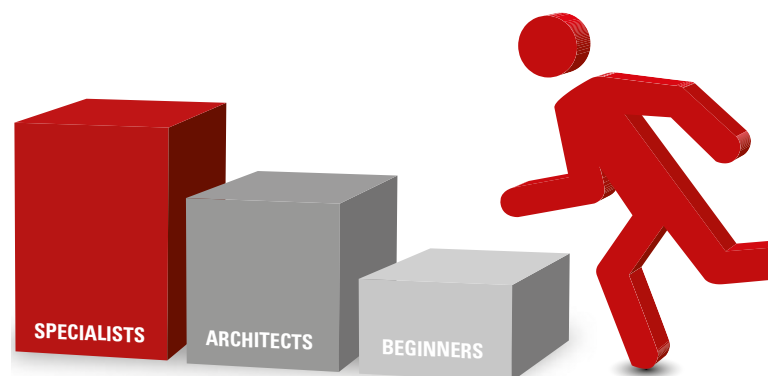

Are you making the best possible use of your Oracle knowledge?

With the OPN Specialized program, we allow our most experienced and committed partners to differentiate themselves in the marketplace and gain a competitive edge by spotlighting their strengths and special skills. By earning a specialization, they get awarded with a distinct recognition for their efforts.

By not only joining for the preparation for the implementation exam, but also taking the exam, you're more than halfway there on earning your specialization. If after completing the exam, you - or one of your colleagues - take the effort of completing the less complicated online sales, presales and support exams, you can call yourself a specialized partner. You will be recognized and preferred by Oracle, differentiated from your competitors and rewarded with additional benefits.

Need even more arguments?

Training schedule

Choose from any of the online training sessions. All tracks and sessions below have been confirmed, but modifications of dates and timings are possible. Visit partnertrainings.oraevents.eu regularly for the most recent training schedule.

A lot of the sessions will be given **live**  at an Oracle location (see the subscription page for details). All the sessions will be given **online**  and interaction with the presenter is possible via VOIP. All of these sessions will be **recorded**  and can be followed at your own date and time. Also, last year's sessions are still very accurate and very available on partnertrainings.oraevents.eu.

EACH SESSION WILL TAKE BETWEEN 1.5H AND 3H.
